

Specification Sheet: 59791

High Capacity Receptacle for enMotion® Flex Automated Touchless Paper Towel Dispenser

Installation:

Because of the wide variety of stud configurations within any given wall there are many ways to mount the receptacle. As such, the installation description & illustrations given are to serve as a guide. To aid in installation, numerous mounting holes have been incorporated to suit a variety of applications. A partition cut out of 54" high x 15.50" wide x 4" deep is required to mount the unit inside the wall. For fastening, GP PRO recommends using #10 self-tapping screws. A professional installation service is recommended.

Mounting should comply with ADA guidelines. Compliance is the responsibility of the installer.

Model Specifications:

This trash receptacle is compatible with the enMotion Flex Recessed Automated Touchless Roll Towel Dispenser (59766). The unit is semi-recessed, with an integral beveled outer frame, providing a pleasing secure to the wall appearance. The dispenser mounts easily and naturally into this unit for a "Perfect Fit". The trash receptacle unit is constructed from type-304 stainless steel with a brushed finish. The waste receptacle is secured in place, and accessed by a hinged door. The waste receptacle insert is a one-piece heavy-duty container that is both sturdy and light weight. The swing-out access door is attached with a concealed full-length piano hinge, and secured with a locking mechanism. Waste receptacle volume is 10.12 gallons.
