Cutlery Efficiency That Fits Your Operation

Finally, a dispenser that helps operators meet their most pressing challenges: reducing cutlery usage, improving hygiene, streamlining employee tasks, and maximizing counter space. SmartStock® Tri-Tower sets a new standard for dispenser performance that your patrons will appreciate.

HYGIENIC, AUTOMATIC DISPENSING

Touchless dispensing means no buttons or levers to push, so patrons touch only the utensils they need. Cutlery is dispensed one at a time, which can help reduce cutlery usage by 31% on average.*

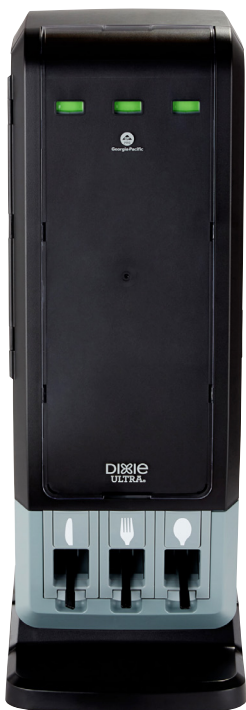

HIGH-CAPACITY EFFICIENCY

Tri-Tower holds 390 utensils and Mini Tri-Tower holds 195, so restocking can be less frequent. And three universal cutlery chambers allow the flexibility to offer any combination of utensils.

17.5"

Mini Tri-Tower

3-IN-1

CONVENIENT 3-IN-1 STATION

Fill dispensers with any combination of cutlery, so patrons get all their cutlery at one station. Replaceable "cutlery badges" above each dispenser opening indicate exactly which utensil they're selecting.

EASY AND INTUITIVE FOR EMPLOYEES

Dispensers are fully enclosed to promote hygiene. Pre-counted, dispenser-ready cutlery refills help reduce loading time, and color display indicators show employees when refills are needed.

RELIABLE TECHNOLOGY, SPACE EFFICIENT

Operators trust Tri-Tower for consistent performance and ease of use. These dispensers require very little counter space and can also be mounted on the wall.

CUSTOMIZABLE INSERTS

Dispenser inserts are available to add colorful design and messaging to the exterior. Or, you can order customized inserts with your own messaging and/or branding.

**31% | Reduces cutlery usage
by 31% on average.***

Put the Wrap on Cross Contamination

Helping to protect customers and employees from cross-contamination is a business priority. And there may be no worse culprit than open cutlery bins. Fortunately, there's an innovative, hygienic alternative to open bins and traditional wrapped cutlery: the SmartStock® Wrapped Cutlery System.

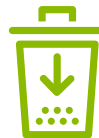

HYGIENIC TO PROTECT CUSTOMERS

Helps reduce cross-contamination with the combination of individually wrapped utensils distributed via a touchless dispenser.

DRIVE-THRU & DELIVERY FRIENDLY

Of course, this elegant system is ideal for dine-in customers. But it's also a responsible—and efficient—addition to drive-thru and delivery operations.

LESS WRAP, LESS LANDFILL

Cutlery is wrapped on the critical end only, using 60% less wrap than fully wrapped cutlery.¹ Plus, one-at-a-time dispensing decreases cutlery waste.

¹NTC Lab Testing

Pre-counted cutlery refills make reloading fast, efficient and hygienic.

1x

24%

One-at-a-time dispensing reduces cutlery usage by 24% compared to fully wrapped utensils in open bins.²
