Touchless Technology in the Service of Hygiene and Infection Prevention

enMotion® Automated Touchless Paper Towel Systems

HEALTHCARE

Georgia-Pacific

Industry-Leading Touchless Dispensers Engineered to Deliver Savings

As patients and employees wash their hands more often, paper towel spend is concerning. And with heightened fears of cross-contamination, touchless dispensing is becoming the norm. That's why enMotion® systems can make a critical difference, particularly in healthcare where infection prevention is paramount and containing costs is key. These efficient, touchless dispensers are engineered to help reduce towel usage and minimize maintenance—and that can drive real savings.

enMotion® controlled dispensing can reduce towel usage by 30%*

The enMotion® Impact on Hygiene and Cutting Total Costs

Usage and Waste Reduction

Adjustable Settings help control sheet length, time delay, sensor distance and towel settings.

One-at-a-Time Dispensing can reduce unnecessary towel usage by at least 30%.*

Zero Roll Waste with technology that ensures one roll is consumed 100% before auto-switching to another.

Longer Service Intervals

Extended Battery Life allows dispensing of 200+ rolls on a single set of batteries.

Multiple Power Options let you choose battery power or optional AC adaptor.

High-Capacity Innovation of Dual Roll Auto-Switch Technology allows seamless transfer from consumed roll to new roll.

Fewer Maintenance Interventions

Guaranteed Reliability with a 10-year warranty.

99% Jam-Free Design and replaceable chassis can help minimize service requirements.

Easy, Intuitive Management including a push-button control panel and auto-feed technology to load towel rolls.

Whisper Quiet operation can help alleviate interruptions.

Elevated Hygiene

Motion Activation allows intuitive, touchless access to towels.

Closed-System Dispensing helps protect towels and hardware from exposure and contamination.

Customizable Settings of Hang Mode or On-Demand options let you control how towels are presented.
