

SMALL (900mL) BOTTLE PROGRAMING GUIDE: 52065

The enMotion® Automated Touchless Counter Mount Soap Dispenser is designed to function with both large (1800mL) bottles and small (900mL) bottles. Note that the dispenser is programmed to accept the large 1800mL bottle from the factory. Before changing to a different bottle size you must reprogram the dispenser.

Programing Instructions

1.

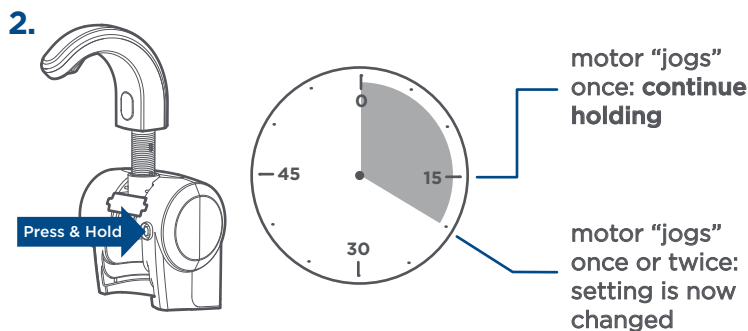

1. Locate the setting button on the front of the motor assembly.

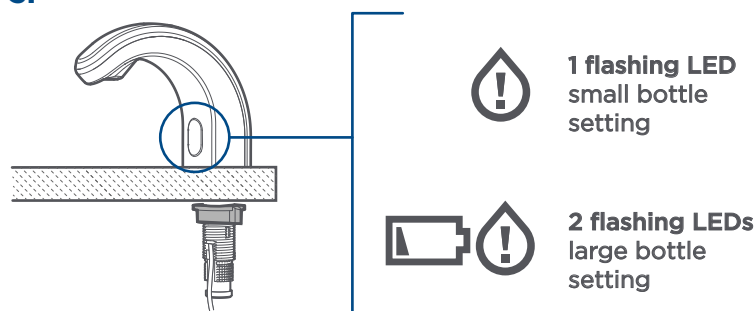

2. Press and hold the button for 20 seconds total. After the first 15 seconds the motor inside the assembly will “jog” once. **Continue to hold the button** for an additional 5 seconds.

3a. If the motor “jogs” **once** more after holding for 20 seconds the dispenser is now programed for the small (900mL) bottle. Additionally, the “low product LED” will blink above the counter to confirm the small bottle setting for 30 seconds.

3b. If the motor “jogs” **twice** more after holding for 20 seconds the dispenser is now programed for the large (1800mL) bottle. Additionally, both LEDs will blink above the counter to confirm the large bottle setting for 30 seconds.

3.

Notes: To change the setting back repeat the steps above. When the dispenser is programed for use with the small bottle the low product indicator will not function. Your setting will be saved for the life of the dispenser, even in the event of a power outage.
