Disposable Cleaning Towels That Perform Like Cloth

Think about the hassle and expense of the laundered cloth towels you rely on for cleaning ... piles of them awaiting pickup, harboring bacteria and often creating unsanitary conditions and foul smells. Dixie® Disposable Foodservice Towels provide an efficient alternative—with selections that can stand up to any challenge, front or back of house. So, say hello to disposable towels and so long forever to your linen service.

HEF Towels

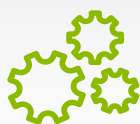

DIXIE® AND DIXIE ULTRA® DISPOSABLE FOODSERVICE TOWELS

A SMART SWITCH: From Laundered Towels to Disposables

With rental towels, you pay for laundering, replacement and delivery ... again and again. Disposable towels eliminate these costs. And you'll instantly notice how reliably Dixie® Foodservice Towels perform.

STRONG & ABSORBENT

MULTI-PURPOSE PERFORMANCE

DISPOSABLE

SOLVENT COMPATIBLE¹

DURABLE & REUSABLE

RAYON:

Light-Duty Bussing

HEF:

Food Prep + Bussing

¹Compatible with common industrial solvents. Towels used with solvents should not be composted after use.

Stepping Away from the Dirty-Water Open Bucket

To avoid exposing patrons to unsanitary conditions, operators are moving away from the open-bucket method of “sanitizing”—and with good reason. Sanitizing solutions can be easily contaminated and cloth towels can lose proper sanitizing strength within 30 minutes¹. Enter the Dixie Ultra® Surface System, a closed dispenser system with quat-compatible disposable wipes. Welcome to a new era of surface sanitizing.

Measuring Cup

Disposable Wipes

Dispenser

Trash Attachment
(optional)

COMPATIBLE WITH: Quaternary ammonium compounds (Quat), peroxide, peroxide with peracetic acid, isopropyl alcohol (70% solution), bleach, and phenolic.

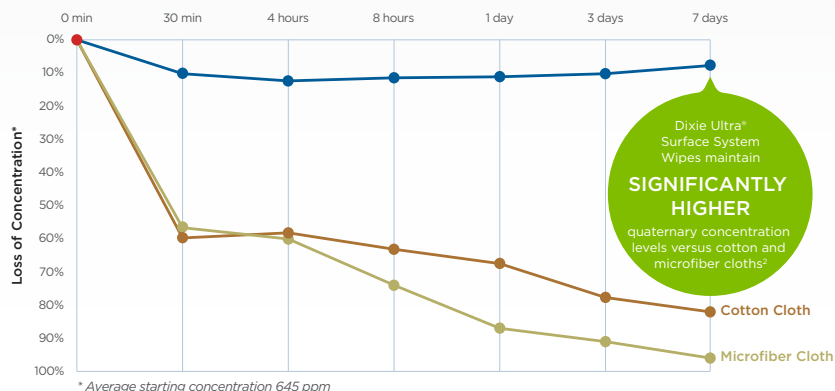

DIXIE ULTRA® SURFACE SYSTEM

THE SURFACE SYSTEM DIFFERENCE: Wipes vs. Cloth Towels

Dixie® Quat-compatible Surface System wipes maintain proper sanitizer concentrations **significantly longer** than cotton and microfiber towels. So, you can sanitize longer without changing solution. Also, the closed system is designed to avoid reintroducing dirty wipes back into the dispenser solution.

Quat loss from solution over time: Dixie Ultra® Surface System Wipes vs. Cloth

¹ Cotton and microfiber cloths were tested as one cloth per one gallon of sanitizer. Dixie Ultra® Surface System was tested as one roll per one half gallon of sanitizer. Refer to your sanitizer manufacturer's instructions for proper concentrations.

² Quat sanitizer loss as a function of time for Dixie Ultra® Surface System, cotton bar mops and microfiber cloths.
